

September 26, 1986

Dear Diane and Joel, and Diana and Darran, and...  
All of us who created a unique situation here can join us.  
To be more concrete, I invite all of us to create the first ever  
live space-bridge between Moscow and San Francisco on  
the November 6, and to prepare us and our countries during  
computer-photophone-faxes from "electronic cafe" at the Exhibit  
here and any place in the world via San Francisco Tele-  
port... Uffff...

Some additional news: 1) there is a signed agreement between  
Velichov's Committee and VSP to approve publication of "Citizen  
Summery", so we are ready to create a dialogue between the  
authors on the Oct. 9, or any date you choose, 2) Soviet film  
is ready for co-production, 3) We need <sup>several</sup> messages on  
the Sept. 26 and 27 from real Creative people as an invitation  
to open communications between the two creative communities  
between the two cultures. These greetings will be shown  
at our "Electronic cafe" to the first person - when the Exhibit  
will be opened on the Sept. 26, 4) The second day - the 27th of Sept -

is a day of Union of Cinematographers. Elton Klimov  
asked you to bring Coppola to share with him as well  
as any other creative celebrities related to Film  
Universe (it gives a chance to demonstrate to all  
creative unions potentials hidden in "Electronic cafe  
menu")... Well, it is a beginning of 45-days marathon, so  
you can argue: is not it a start appropriate for a sprinter?  
No, a "critical mass" on this side already shaken many  
suggestive barriers in our consciousness. So I invite you to  
use a support of Troff's system to share experience and  
guarantee an ongoing supply of creative energy from  
your side, 5) on the Oct. 29, a day of Documentary  
film makers; they (my old colleagues: a film is already  
launched based on my script; the final part will  
will translate tomorrow). I hope to surprise you by it).  
So, they want to take live from "Electronic cafe" to  
Nevada and Semipalatinsk test-places and shoot

as real all human perceptions -  
Daneau's and Diana's Soviet-american Venture is a  
unique chance to overcome all ego-barriers and to open  
high-toned communications between our two nations  
instantly and forever.  
Love Joseph
